

# TRULY GREEN TECHNOLOGY

## EnviroLoc<sup>+</sup> BIOBASED BACKING SYSTEM

SYNLawn's exclusive EnviroLoc™ + Backing System is an environmentally friendly, multi-layer component system that "locks" in durable turf fibers, extending the product's life cycle. Made in the USA, the EnviroLoc + Backing System replaces a portion of petroleum-based polymers with biobased polymers created from sustainable resources including soybean oil. In addition to SYNLawn's iconic green soy backing, the back of every SYNLawn product contains a certification number and logo.

*Polypropylene and  
Polyester backing*

- ▶ Created with a durable 2-part woven (Polypropylene and Polyester) backing for a fuller tufted look.
- ▶ Less fiber loss for a more environmentally responsible approach to synthetic grass.
- ▶ Reduces algae and fungi growth to help alleviate allergies in the environment.
- ▶ The long-life expectancy of SYNLawn's artificial grass and recyclable properties reduces the impact on landfills, eliminate emissions from lawn care tools, and save precious water resources.
- ▶ SYNLawn's EnviroLoc + Backing System makes it the cleanest and safest turf available.

# ANTI-MICROBIAL TECHNOLOGY THAT MAKES THE DIFFERENCE

SYNLawn is the exclusive turf partner of Sanitized. With over 84 years of experience, Sanitized has developed technologies for antimicrobial hygiene function and material protection.

Natural Oxygen Molecules

Oxygen consuming Fungi

## ALGAE AND FUNGI PREVENTION

Algae and Fungi are known health risks that can harm local wildlife and cause toxic runoff water and thrives in warm and wet environments. Algae creates dead zones by depleting water of its natural oxygen, which can create unsafe water that wildlife could consume. This is also an expensive and challenging situation to treat the water. With the addition of the Sanitized hygiene function, SYNLawn’s artificial grass has protection from the formation of fungi and algae. This added protection from Sanitized extends the life of the surface and helps to reduce allergens in the immediate environment.

Fungi

EnviroLoc+ Sanitized Coating

## FUNGI CARBON RELEASES

Fungi is constantly floating around, everywhere. It’s a common reason for respiratory allergies, similar to pollen and pet dander. It is often costly and time consuming to remove fungi which is why SYNLawn’s EnviroLoc+ Sanitized coating is an important feature to keep you safe.

OUR PRODUCTS ARE SUSTAINABLY CREATED  
WITH THE ENVIRONMENT IN MIND.
