

COMMON AREAS: ROOFTOPS

Artificial grass for rooftops can transform an ordinary space into something you can enjoy everyday with your family and friends. With artificial grass, our residential customers are getting the most out of urban living, maximizing every square foot of living space.

Commercial buildings are increasingly using artificial grass for rooftops to create gardens and dual use work/entertainment areas. SYNlawn® is lightweight, provides outstanding drainage, and is the only artificial grass product to carry a Class 1 fire rating.

OUR MISSION

Our core belief is that every space, every day, has the potential to improve your quality of life. In short, our mission is to help our customers do more of what they want to do, when they want to do it, in the spaces that they love the most.
